Find the Right Aggregator for Your Broking Business

Canonical: https://directory.redrock.com.au/entry-pathways/find-the-right-aggregator/find-the-right-aggregator-for-your-broking-business/

Description:

Find the Right Aggregator for Your Broking Business. Explore Redrock's independent aggregation models, technology, lender access and broker support.

Details:

Choosing an aggregator means comparing the support behind the commission split. Redrock combines technology, compliance infrastructure, lender access and direct support with the freedom to operate under your own brand.

Start with your business goals

Consider your experience, current volume, client needs and the support you need to build your business. Redrock offers four independent commission models: **New Entrant, Advantage, Prime and Maximiser**.

What to compare

- Commission splits and ongoing fees, including the total cost at your expected volume
- Lender access and accreditation requirements
- Technology for lodgement, CRM, compliance and broker support
- Training, onboarding and mentoring appropriate to your experience
- Agreement terms, client relationships and business ownership

Brokers retain full ownership of their brand, their business and their client relationships.

Read the commission model comparison, explore Redrock's technology, or review the initial investment. Call **1300 667 694** for a discussion about your circumstances.
